*The Final WInS Portfolio at Cost on the Original $300,000: Laura's Plan in Miniature*

| Ticker or identifier | Name of investment | Asset type | Units bought / target | Amount ($) | % of total | Pays for |
|---|---|---|---|---|---|---|
| IBTM | iShares iBonds Dec 2032 Term Treasury ETF | ETF | 4,503 / 4,503 | 97,489.95 | 32.50 | 2033 and the floor |
| IBTO | iShares iBonds Dec 2033 Term Treasury ETF | ETF | 1,024 / 1,024 | 23,408.64 | 7.80 | 2034 |
| IBTP | iShares iBonds Dec 2034 Term Treasury ETF | ETF | 927 / 927 | 22,155.30 | 7.39 | 2035 |
| IBTQ | iShares iBonds Dec 2035 Term Treasury ETF | ETF | 894 / 894 | 20,973.24 | 6.99 | 2036 |
| IBTR | iShares iBonds Dec 2036 Term Treasury ETF | ETF | 853 / 853 | 19,823.72 | 6.61 | 2037 |
| 912810PT9 | T-Bond 4.750% 15-Feb-2037 | Bond | 20 / 20 | 19,203.80 | 6.40 | 2038 |
| 912810PX0 | T-Bond 4.500% 15-May-2038 | Bond | 20 / 20 | 18,615.26 | 6.20 | 2039 |
| 912810QD3 | T-Bond 4.375% 15-Nov-2039 | Bond | 18 / 18 | 16,200.95 | 5.40 | 2040 |
| 912810QL5 | T-Bond 4.250% 15-Nov-2040 | Bond | 18 / 18 | 15,790.32 | 5.26 | 2041 |
| 912810QT8 | T-Bond 3.125% 15-Nov-2041 | Bond | 20 / 20 | 14,991.00 | 5.00 | 2042 |
| | Treasuries for the ten payments and the floor | | | 268,652.18 | 89.55 | |
| VT | Vanguard Total World Stock ETF | ETF | 167 / 164 bought last, with the rest | 26,524.61 | 8.84 | Range top, flexibility |
| N/A | Cash | Cash | | 3,513.79 | 1.17 | |
| All holdings | | | | 298,690.58 | 99.56 | |
| Costs at purchase, not a holding: fees and accrued interest | | | | 1,309.42 | 0.44 | |
| **Total** | | | | **300,000.00** | **100.00** | |

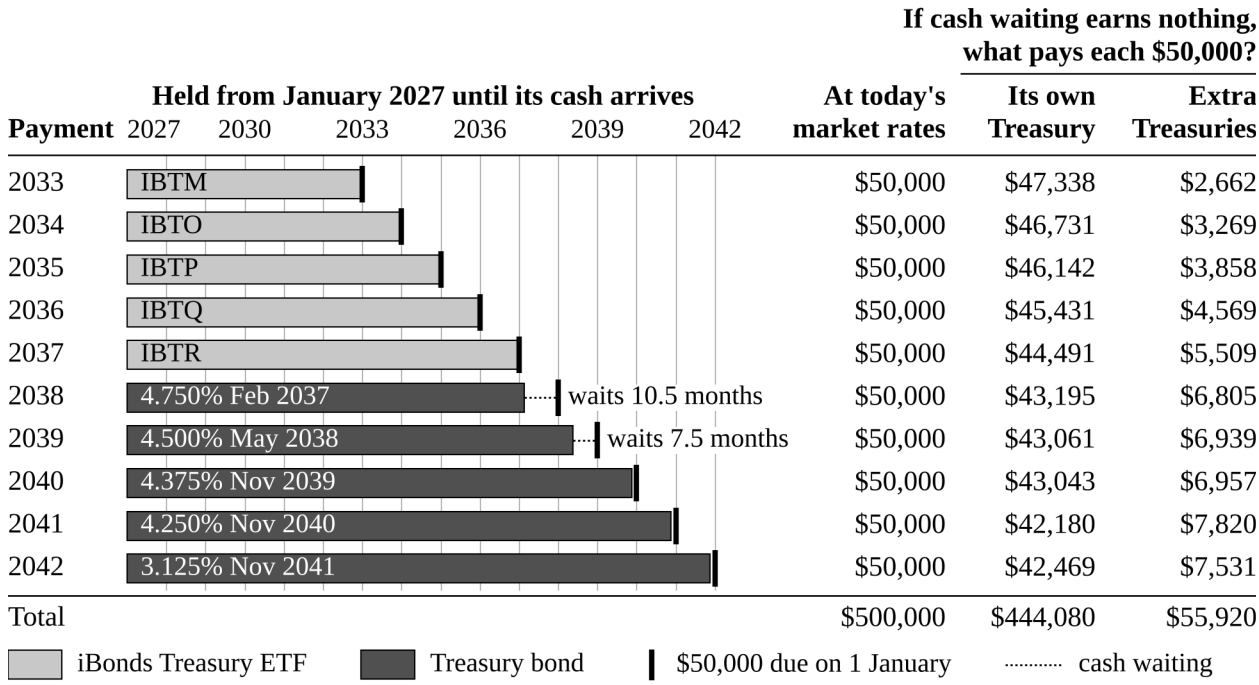

*Note.* [Note to carry: amounts at cost: units held x price paid on 6-7 Oct 2026 (U.S. Eastern), on the original $300,000 (8g); units bought / target: targets set before the first trade (Portfolio tab, 2 Oct prices); a bond unit is $1,000 of face value (8m); the other two targets, met: every bond bought within 25 basis points of the Treasury curve; cash never below $1,000 (8m; 2.5); Pays for: each holding's payment (1 January; 23 Oct snapshot); the floor: the least Laura can promise co-sponsors in 2031, IBTM standing in (TNA l.13, CANON A24, 8g); costs row: $200 of fees and $1,109.42 of accrued bond interest, repaid with each bond's next coupon (8g v2); identifiers: tickers for funds, CUSIPs for bonds (8g, card Q38); VT bought last, with the cash left (8m).]

**Figure 1**

*Each Payment Has Its Own Treasury, and Extra Treasuries From the 2028 Deposit Pay Any Gap if Cash Waiting Earns Nothing (Laura's Plan for Both Deposits, $450,000, Modelled)*

| Payment | At today's market rates | If cash waiting earns nothing, what pays each $50,000? Its own Treasury | Extra Treasuries |
|---|---|---|---|
| 2033 | $50,000 | $47,338 | $2,662 |
| 2034 | $50,000 | $46,731 | $3,269 |
| 2035 | $50,000 | $46,142 | $3,858 |
| 2036 | $50,000 | $45,431 | $4,569 |
| 2037 | $50,000 | $44,491 | $5,509 |
| 2038 | $50,000 | $43,195 | $6,805 |
| 2039 | $50,000 | $43,061 | $6,939 |
| 2040 | $50,000 | $43,043 | $6,957 |
| 2041 | $50,000 | $42,180 | $7,820 |
| 2042 | $50,000 | $42,469 | $7,531 |
| Total | $500,000 | $444,080 | $55,920 |

*Note.* [Note to carry: 1. "if cash waiting earns nothing", defined once: money already received earns nothing while it waits; every coupon and fund payout still counts (WORDS; 8h); 2. the last column reconciled: the extra Treasuries' $35,894 (January 2028) buys $36,867 at face; with $19,143 of their own interest, summed undiscounted, they pay $55,920 after $90 of the waiting fund's 0.15% fee; at today's rates about $45,500 comes back (1 Jan 2033 money) (8h); 3. the ratio with its reason: about $1.11 for each $1 on 1 Jan 2033 at today's rates, because the extra Treasuries are sized for cash waiting earning nothing (8h; card Q31); 4. Treasury par curve of 6 Nov 2026; each payment in its own year's dollars (8h); 5. bars end when the cash reaches Laura: a fund a few days after its 15 December end, a bond on its maturity date or the next business day (8h cash table); 6. if room: paid in every historical rate stretch tested (585 starts, 1962-2010;

NUMBERS 2); the top-up, $2,388, completes the ten, in "Its own Treasury"; the floor's IBTM shares are a separate lot from the 2033 payment's; rows may not add because of rounding.]

**Table 2**

*Laura's Plan for Both Deposits ($450,000) in Five Markets and in History Since 1962, Modelled*

| World | Ten payments | Stated in 2031 | | Flexibility (Jan 2033) |
|---|---|---|---|---|
| | | Bottom | Top | |
| Today's forward rates | All paid | $95,000 | $115,000 | $29,800 |
| Replay from 2006: shares fall | All paid | $95,000 | $105,000 | $19,500 |
| Rates 3 points lower for good | All paid | $80,000 | $95,000 | $21,100 |
| Replay from 2007: rates fall early | All paid | $80,000 | $95,000 | $21,900 |
| Inflation: rates 3 points higher | All paid | $100,000 | $120,000 | $23,600 |
| *All 585 history replays (1962-2010 starts)* | | | | |
| 1-in-20 low | All paid | $80,000 | $95,000 | $19,700 |
| Median | All paid | $95,000 | $115,000 | $31,800 |
| 1-in-20 high | All paid | $115,000 | $140,000 | $49,600 |

In every world and every replay, the facility contribution in January 2033 equals the stated top.

*Note.* [Note to carry: MODEL, not forecasts; Treasury curve of 6 Nov 2026; shares 7.5% a year in rows 1 and 3; replays: U.S. yields and stocks from the start month (method in 3e); inflation row: prices up 5% a year; flexibility: the half of VT promised to no one plus whatever the funds pay above the stated top, to the nearest $100 (8i); spread rows: each column's own percentile; each row is a different market before January 2028; within each, the bottom is fixed from then.]

**Table 3**

*Seven Signals to Watch as 2031 and 2033 Approach; Two Can Change Laura's $450,000 Plan*

| Signal | Who | Carry on while | Look closer or act when | What it changes; what it never changes |
|---|---|---|---|---|
| *The two reasons to change the plan* | | | | |
| The 2028 deposit ($150,000) | Laura | Confirmed by 1 Dec 2027; its first $38,282 to the payments | Nothing received by 31 March 2028 (a missed deposit) | *Changes:* no range until money comes; 2033's payment $3,016 short at today's rates. *Never:* a sale. |
| Treasury payments | Team | Paid when due, or the next business day after a holiday | A Treasury default: a payment over five business days late | *Changes:* payments and range, restated on what was paid. *Never:* a forced sale. |
| *Look closer: a date or an instrument may change, never the plan* | | | | |
| Debt-limit X-date | Team | No X-date within a month of a cash date | An X-date within a month of a cash date | *Changes:* nothing before it. *Never:* a sale ahead of it. |
| iBond fund notices, the floor's too | Team | Ending notice in October; cash 4 to 9 business days before the year's last (4 to 6 for 2036) | No notice by 31 October, or one that ends a fund early, merges it or moves its end past a payment | *Changes:* the fund, for a Treasury maturing just before it's needed; any gap from the extra Treasuries, the floor's from its 0.5% margin. *Never:* VT. |
| Trades in 2027, 2028, 2031 | Team | Limit orders near each fund's value | A date cannot be kept (a trading halt) | *Changes:* the date. *Never:* the step or its order. |
| *Watch: the plan carries on* | | | | |
| Treasury yields and share prices | Team | Any level: a fall in the market is not a reason | None. 1 percentage point lower before 2027: an $85,000 bottom | *Changes:* the bottom to Jan 2028, the top to the 2031 move, then her flexibility. *Never:* the payments. |
| Her flexibility's three uses | Laura | NT$32.768 per US$1 (6 Nov 2026); building costs 1.5% to 5.0% a year | A Taiwan dollar 10% stronger ($11,500 more on $115,000) | *Changes:* a call on her flexibility and anything above the top ($29,800). *Never:* the range. |

*Note.* [Note to carry: $38,282: top-up ($2,388) and extra Treasuries ($35,894); X-date: when the debt limit stops the Treasury paying every bill (its estimate, else the Congressional Budget Office's); cash dates: fund payouts, maturities, trade days; payments hold to a 3.60-point fall before 2027.]
