M1 meeting pack v2 (checked): Tue 20 Oct 2026, 20:00 Sydney (30 min)

> **Tonight, Tue 20 Oct.** Sydney = US Eastern time (ET) + 15 hours, until US clocks change on 1 Nov.
>
> 1. **20:00-20:30 (05:00-05:30 ET): M1.** Ray chairs. Name a recorder first; pick roles.
> 2. **Then the form check (section 4), before sending:** question 5 depends on it. Ray clicks, rules lead records, deputy watches [checked]. Look only.
> 3. **By 22:00 (07:00 ET): Ray sends the Wharton questions** via Contact Us. If the check runs late, send anyway with question 5.
> 4. **By 22:00: IPS Doc clean-up** (editor; deputy watches), in the safe order in section 4 (name a version first [checked]).
> 5. **Before bed:** historian logs AI use; Ray checks the AI routines; fork, then repo.
>
> **Never press tonight:** SMApply "Submit Your Application" or "Mark as Complete" · Docs "Delete history", "Make a copy", "Restore this version", or "Reject all" before the suggestion list · any WInS order or note · GitHub "make private" before the fork is gone · any AI, integrity or terms checkbox.
>
> **Next:** TNA AI-use line voted at M2 (Wed 21, 20:00), fallback chat vote Thu 22 12:00. Submit Thu 22, 19:00-20:00 (04:00-05:00 ET). Deadline Fri 23 Oct 5 pm ET = Sat 24 Oct 08:00 Sydney. No extensions.

AI-generated meeting aid (Claude Code, 20 Oct): decisions, facts and checks only. Log it as AI use. **At 10:15 today:** no team change since the baseline (GitHub main = the Mon 19 Oct 10:28 merge; IPS Doc last edited Sun 18 Oct 11:49) [checked]; 10 AI suggestions pending; no student TNA text (change check).

1. Agenda

Log items DL-01 to DL-06 number tonight's decisions in the team's decision log. The TNA kit's drafting questions **D1-D7** are separate: DL-03 (TNA picks) is not D3 (floor rounding).

Min	Item	Log item
0-2	Name the recorder. **Vote the decision rule first**	DL-06
2-10	Read aloud AI policy page lines 377 and 370 (not 465). **Vote the AI rule**	DL-01
10-17	Roles from pick sheets: fixed, then uncontested, then clashes (30-second reason each, vote)	DL-02
17-24	TNA picks, order, and who does each job	DL-03, DL-04
24-30	Housekeeping owners, incl. the AI text in the IPS Doc. Chair reads every decision back	DL-05

2. Facts for each vote

DL-06: how a vote passes

- Proposal (operating plan): more for than against, at least 4 of 6 voting. Absent members vote in chat by 22:00 that night (TNA week). Dissent recorded in the member's words. Reopening needs new evidence and 4 votes.
- Wharton: "at least four active members at all times to compete" (AI policy page, line 370).
- No vote is recorded for the 16 Oct rule, the 17-18 Oct example text or the 19 Oct AI instruction; 18 Oct has no record (decision log).
- Advisors "may not make decisions on behalf of students" (team-process review).

DL-01: the AI rule

Every option must meet line 377 ("You may not submit any work generated by an AI program as your own"; AI use "must be recorded in your Works Cited pages") and line 370 (never "pass AI generated writing or work off as your own").

Option	Allows	Fit
(a) Repo AI instruction "Never write, rewrite or suggest wording", plus AI checks that return issues only	AI facts, numbers, error lists. Students write every word	Fits both if each check is logged with prompt and output. Added 19 Oct without a vote

Option	Allows	Fit
(b) No AI on deliverables	Not even checks	Fits both. Past AI use is still recorded; the two note clauses still need disclosing
(c) 16 Oct "[AI] suggestions" rule	AI wording in deliverables as suggestions	**Conflicts with line 377.** Logging AI text does not make it students' work

- Rules page: AI work must be "properly cited"; Wharton may use "forensic analysts".
- Line 465 ("Don't use AI for personal reflection") is advice under "Using AI Responsibly" in the Pre-baccalaureate section (lines 393, 413), not a competition rule.
- The "Statement of AI Use" is a policy-page heading to review, not sign; it covers all Global Youth students [checked]. The "application integrity statement" covers summer-program applications. Lines 370 and 377 are the competition rules (AI statement check).
- Version 5 is 97% AI example text; the three Doc reflections are wholly AI text, still tagged "[AI]" (19 Oct update).
- **The VT note and the Nov-2040 bond note each hold a long clause** (VT: 12 words, 13 if "co-sponsors" counts as two [checked]) copied word for word from the public 30 Sep AI EXAMPLE notes (timeline check; AI-use register rows R12, R21). Notes can't be edited and the TNA quotes them exactly: disclose only.
- Also decide: do grammar suggestions count as AI help?

DL-02: roles

- Ray is leader (a change needs a written advisor request), submits everything, and must be 16 or older (Global Youth FAQ). Ray trades under the 7 Oct team rule, which may be re-voted.
- The 12 roles: operating plan section 1 (pick sheets).
- At most 3 main roles and 2 backups each; Ray at most one more.
- Never the same person: deputy and leader; historian and chair; trade-log keeper and trader or backup trader; deputy and historian; paste checker and submitter or author.
- Pick by preference and workload (semifinalists explain how each member "contributed value to the team").

DL-03: the three TNA notes

- On record: IBTM; IBTR (the 04:42:53 AM ET order); VT.
- Rules: executed trades, notes quoted "exactly as it appears in WInS", reflections of 100 words or fewer (TNA instructions).
- Paste check (characters incl. spaces): VT 288, IBTR 294, IBTM 292. VT, the cancelled IBTR and Nov-2041 are all 288; IBTR and IBTO are both 294. Also check ticker, time, opening words. The cancelled IBTR note says "0.3", the filled one "about 0.2" (kit).
- VT: holds the copied clause [checked]; its note says "only", but Version 5 gives the fund 2 jobs (accepted) or 3 (pending).
- IBTR: why it was chosen over a listed Feb-2036 bond is not recorded.
- IBTM: "refined" needs the 6 Oct email's arrival time (kit question D7), which is UNVERIFIED.

DL-04: authors, checkers, clock

- One author per note plus a backup. Two non-author scorers. Paste checker (not submitter or author) [checked]. Deputy watches the submit.
- Clock (Sydney): drafts Wed 21 18:00 · M2 Wed 20:00 (AI-use line vote) · fallback vote Thu 22 12:00 · **text lock Thu 16:00** · M3 approval Thu 19:00 · submit 19:00-20:00.
- Kit questions D1-D7 are logged before drafting so reflections match each other and the IPS. The clock above breaks this: vote **REQ-DT** (section 6) under DL-04 [checked].

DL-05: IPS Doc AI text and housekeeping

- A whole-Doc PDF printed both wordings of the pending suggestions; one-tab export untested.
- Options: reject the suggestions, then move Version 5 and the [AI] reflections to a **separate file** (runbook's choice) or an AI tab, or delete them. Never just strip the tag.
- Owners: Doc clean-up (editor, deputy watching) · fork, then repo private (fork owner, repo owner) · TNA form screenshots (rules lead, Ray) · 6 Oct email arrival time (rules lead) · Wharton questions (Ray) · school letter request by Fri 23 (liaison) · AI-use register rows R12, R19, R20, R21, R29, plus R24, R28, R32, R33 and this wave's files [checked], by Thu 22 16:00 (historian).

3. Thursday only: which SMApply button submits the TNA

Submit works only once all required tasks are complete, so an early lock is unlikely; the bigger risk is **not pressing** a Submit that is the real TNA delivery (runbook):

What you see	What you press
1. TNA is the only open task; Review & Submit active	Submit
2. Submit blocked or missing	Mark as Complete, check the status, then Contact Us to confirm receipt
3. IPS/Final Report tasks also open and editable; Submit active	Mark as Complete only; ask Wharton; vote at M3

If the form says how to submit, follow it. Screenshot the statuses.

4. Tonight after M1, step by step

1. Form check (Ray's own SMApply login; look only):

- (A) SMApply Pages tab: Deliverables, Trading Details, any "trading requirements" page.
- (B) Weekly emails in WInS. Only Ray at WInS; others watch by screen-share.
- (C) Open the TNA task, press nothing. One application or several? Text boxes or upload? "Mark as Complete" or "Submit"? Reopenable? Any AI field, or AI, integrity, "own work" or terms checkbox (TNA or roster task)? Screenshot it; don't tick it before the team decides. Note each task's status and the deadline shown (should be Sat 24 Oct 08:00). Write down which buttons the roster took and what My Applications shows for it now: the best evidence for section 3 [checked].
- Screenshots: private Drive only, never the repo (login checks).

2. Ray sends the questions by 22:00 (questions file):

- One message, items 1-5: TNA AI-use record; word counting; "required trading activity"; if the leader can't submit; the SMApply form (only if step 1 leaves it open). Drop anything step 1 answered.
- A student rewords each item. No draft text or strategy. Subject 80 characters max; no attachments.
- Send from the SMApply-registered address [checked]. Save the text, log the time (ET and Sydney), copy the advisor. A reply by about Thu 22 08:00 can still matter; don't wait for it to draft.

3. IPS Doc clean-up (editor signed in as themselves; deputy watches; no AI). "Reject all" may hit every tab and students' suggestions too (UNVERIFIED). So:

0. Name a version ("Before clean-up 20 Oct") before anyone touches the Doc [checked].
1. Test in a new blank Doc: a suggestion in each of two tabs; Reject all in one; does the other survive?
2. Open Comments; list every suggestion with author and tab.
3. Settle each student suggestion one at a time, its author deciding.
4. Name a second version.
5. Then Reject all AI suggestions on every tab, and move the AI text out as voted (runbook).

4. Historian logs AI use: this pack, the kits, the questions, the runbook: student, purpose, use.

5. AI routines may read a logged-in WInS or SMApply session; a mock-judge run is due about 1 Nov; check whether `caplet-judge-tna` ran about 18-19 Oct (if so, an AI-use row) [checked]. Still running: UNVERIFIED. Decide under DL-01 whether to pause; whoever runs them logs paused or already stopped (pre-mortem).

6. Fork, then repo. The public fork exposes every saved change, including the example-text branch and client contact details (tested). Screenshot Traffic, back up; fork owner deletes the fork; then repo owner goes private (exposure audit).

5. Do not do

- Don't paste or reword AI or kit text into a reflection. No AI rewriting, "humanising" or edits to beat AI detectors.
- Only Ray trades, only after a logged vote. No AI tool on WInS, SMApply or Drive.
- Don't present line 465 as a competition rule. Don't delete the AI record to hide it.
- No dollar range, floor or reserve in the TNA, and no WInS gains or losses (TNA instructions).
- No personal data in the message or public files. Never contact Laura Gao.

- No ranking of teammates. No Saturday submit. Don't leave the AI-use line to M3 (after the text lock).

6. Clashes to settle

- **REQ-DT, draft timing (vote under DL-04 tonight) [checked]:**
  - R1. No author writes reflection content that depends on a D1-D7 item until its outcome is logged.
  - R2. Choose one. **(A)** D1-D6 by logged chat vote closing **Wed 21 12:00** (at least 4 votes); D7 when the email time is found; M2 confirms; drafts stay due Wed 18:00. **(B)** Votes at M2 Wed 20:00; first drafts move to **Wed 22:00** (the "revised drafts" slot); scorers' marks still due Thu 12:00.
  - R3. If (A) has fewer than 4 votes by 12:00, (B) applies.
  - R4. Text lock Thu 16:00, M3 and the submit time do not move.
- **12 or 13 words:** the kit says "12 words" (VT section) and "13-word" (Part 0); the register says 13. Same clause: 12 if "co-sponsors" is one word, 13 if two. Rule [checked]: quote the clause, or write "12 words (13 if co-sponsors counts as two)"; never a bare number. Question 2 asks Wharton how hyphens count.

Glossary (shortened [checked]; full list in v2)

- **TNA:** Trading Notes Analysis: three quoted notes plus reflections.
- **IPS:** Investment Policy Statement, due 6 Nov. **IPS Doc:** the Google Doc "IPS Report".
- **D1-D7:** the TNA kit's drafting questions, not log items.
- **WInS / SMApply:** Wharton's trading simulator / submission site (SurveyMonkey Apply).
- **Mark as Complete:** finishes one SMApply task (editable until the application is submitted or the stage deadline passes [checked]).
- **VT:** Vanguard Total World Stock ETF.
- **IBTM / IBTR:** iShares iBonds Dec 2032 / Dec 2036 Term Treasury ETFs.
- **Example text:** AI-written sample IPS and reflections (17-18 Oct v1-v12; older v3-v14 exist [checked]).
- **Version 5:** IPS Doc tab with the latest draft (97% AI exemplar text [checked]).
- **v12 suggestions:** AI wording in the Doc as suggested edits.
- **AI routines:** automatic AI jobs on the leader's machine.

Sources

As in v2 (Sources). AI policy lines = the 19 Oct copy `oct19/office/web/ai_policy_2026-10-19.txt`. Each [checked] item is traced in `oct20/verify_m1v2/verify_m1v2.md`.
