TNA teardown: what is wrong with the current draft and what to do before Thu 22 Oct 16:00

AI-generated review (Claude Code), Wed 21 Oct 2026, ~18:10-19:30 Sydney. Read from the live "IPS Report" Doc, tab "Trading Note Reflection", top "Rewritten" table (Doc last edited 21 Oct 16:08 Sydney). **No replacement wording is given on purpose** (the team's rule and Wharton's AI policy): each item says what is wrong and what the fix must achieve. Log this review in the AI-use record. Evidence files: `oct21/tna/panel/panel.md` (4 mock judges), `factcheck/factcheck.md` (facts, word counts, exact match, AI overlap), `research/research.md` (Wharton texts, past examples), `week4/week4_impact.md` (the Week 4 email).

Verdict in one line

Competent but not Top-50 yet: the mock panel averages **5.2-5.4 / 10 per reflection, 5.8 for the set** (AI opinion; Top-50 contention starts around 7.5). Two false facts, three claims that contradict your own filed notes, about a quarter of IBTM and IBTR copied from the AI versions, and the single strongest thing you have (IBTR's pre-set test) is not used. **Keep the three picks** (IBTM, VT, IBTR): they are the only set that covers payments, floor and growth.

Do these, in this order (minutes = student time; all by the Thu 16:00 text lock)

#	Fix (requirement, not wording)	Note	Why	Min
1	**Delete "about 7.5% a year per JPMorgan".** Use the IPS's 7% or no forecast. 7.5% is JPMorgan's non-US developed (EAFE) figure; world stocks are 7.00%.	VT	False fact; contradicts IPS V5 (judged together)	2
2	**Fix "2036 Treasuries that mature in December 2036".** The fund's bonds mature during 2036 (average around May); the fund itself closes about mid-December and pays out then. Also "held to maturity" is bond language: a fund is held until it closes.	IBTR	False fact a finance judge spots	3
3	**Remove "clear yield" and "matures on a set date" and "a stock crash will not make her promise fail".** Your own filed note says "the final payout is not fixed". State the protection the way the IPS does: the floor is quoted rounded down so the minimum is one she already owns. No "promise", no "will not fail".	IBTM	Contradicts the filed note; the case warns over-promising "could damage her credibility"	5
4	**Use the pre-set test.** The IBTR note set a test in advance (yields falling ~0.2 points by January). Say what has happened since, with a date and a basis: on the note's basis (cost of the ladder, 19 Oct close) the line has **not** been crossed (about $297k, ~$2.8k of room); counting the 0.07% iBond fee it sits right at $300k. Say what the rule does if it is crossed. Replace the last sentence, which only repeats the note.	IBTR	Biggest single score gain: it is the only "tested" decision in the set (TNA asks "supported, tested, or refined")	15
5	**Rewrite the AI-copied parts in your own words.** IBTR: "We bought the ladder from 2042 backwards because the furthest payments are most sensitive to interest rates" is the AI sentence with two words swapped (28% of IBTR's words sit in 5-word runs shared with the AI version). IBTM: the first three sentences follow the AI IBTM text sentence by sentence (24%). VT is clean (5%).	IBTR, IBTM	Authorship: Wharton bans submitting AI work as your own; these are the lines anyone comparing would flag	15
6	**Fix "from 2042 backwards".** True only of the first round of orders on 6 Oct; IBTR's order was cancelled and re-placed after IBTM, and all filled at the same open. Wharton says it verifies trades. Either describe the order honestly or drop the claim.	IBTR	Checkable against WInS times	5
7	**Make IBTM's "refined" story accurate.** The 6 Oct email changed **Laura's real plan** (no zero-coupon STRIPS); IBTM was already your WInS stand-in on 29 Sep, so "therefore became" over-credits the email. Then add the IPS consequence (floor quoted rounded down because the payout is not fixed).	IBTM	The only "refined" decision in the set; make it true and tie it to the IPS	10
8	**VT: stop giving Laura's half jobs the note denies, and keep it inside the portfolio.** The note says stocks "only set how far her gift rises above her promised minimum"; the reflection also has her half covering payment shortfalls and says it "stays Laura's". The case requires payments funded from the portfolio, no outside money. Decide what the half is for (this is the D10 vote) and say it consistently with the IPS.	VT	Contradicts the filed note and the case	15
9	**Anchor "9%".** It is the WInS share; in Laura's real plan stocks are about 7%. Say once in the set that WInS shows the plan after both deposits, scaled down.	VT	Judges compare WInS with the IPS	5

#	Fix (requirement, not wording)	Note	Why	Min
10	**Mention liquidity once.** Wharton's TNA purpose names "growth, risk, liquidity, funding reliability, financial flexibility"; none of the three reflections uses liquidity (maturities, not sales, fund each payment).	any	Covers an official dimension cheaply	5
11	**Word budget.** VT and IBTR are at 99 (a cruder counter gives 104 and 101). Aim for 95 or less each so the form cannot reject them; cut filler (e.g. "the part that grows", restated note facts) before adding anything.	all	Hard limit: "100 words or fewer"	10
12	**Paste notes from WInS (or the WInS export table), never from the "## VT" working section** (it says "co-sponsors here"; WInS says "hear"). All three notes in the top table match WInS byte for byte.	all	"Include each Trading Note exactly as it appears in WInS. Yes, we will verify this."	2

Process items (still needed for Thursday)

- **AI-use line for the TNA:** decide at M2 tonight (or by Thu 12:00), not at M3 19:00 after the 16:00 lock.
- **Do not leave the [AI] versions next to the student text in the same tab** when you submit; move them to an "AI reference" tab. Never delete version history.
- **Submit per the three-case rule** (runbook): open the form, screenshot statuses, press only the button the case picks; screenshot the confirmation.
- **Also open the IPS form on Thursday.** The Week 4 email says the IPS is now a SurveyMonkey Apply form, not a PDF, but the public instructions still say "Submit as a PDF ... 5 MB" (not updated as of 21 Oct 07:16 UTC). Ask Wharton which applies. Final Report instructions: Mon 9 Nov 09:00 ET = **Tue 10 Nov 01:00 Sydney** (the pack's "Mon 9 Nov 16:00" is 9 hours early).

What Wharton actually marks (research summary)

- No separate TNA rubric: it is read with the IPS and Final Report against the five criteria, "together", for "a clear and consistent investment strategy across all three". Its weight in the Top-50 cut is not published.
- The test this year: three decisions that show strategy was "supported, tested, or refined"; each reflection answers why, fit with the strategy, and the client's goals/funding needs/risk, in 100 words or fewer; reasoning quality, "not simply whether an investment gained or lost value".
- Past evidence is thin (no champion's notes are public). The one Top-50 example found (2023-24) showed an early mistake and a later rule-following trade; the six non-qualifiers (including Caplet 2025-26) shared: past returns as reasons, jargon, generic "this taught us" endings, no client link, note not quoted.

Bottom line for the team

Items 1-3 and 12 are 15 minutes and remove every false or contradictory statement. Items 4-8 are where the score moves (tested + refined + client-consistent), about an hour of student writing. Do them before M3; if time runs out, do 1, 2, 3, 5, 12 first.
