> **[v2] This v2 (20 Oct 2026) replaces v1 (`Caplet_Login_Checks_20Oct2026.pdf`); it applies every fix in `verify_logincheck/verify_logincheck.md` (7 medium, 11 low) and adds its missing checks. Use v2 only.**

Login-only checks: one consolidated list (Team Caplet, Tue 20 Oct 2026, Sydney)

AI-generated process checklist (Claude Code, 20 Oct 2026). It lists the checks that only a logged-in team member can do: WInS (Stock-Trak), SurveyMonkey Apply (SMApply), Google Docs/Drive version history, sharing and export, the team's email, GitHub settings, and the scheduled routines on the leader's machine. It holds no TNA, IPS or Final Report wording. If the team uses it, log it in the AI-use record as a "process/tooling" row. Wharton: "If you use AI to assist you in any way during the competition, how you use it must be recorded in your Works Cited pages" (AI Policy, AIP:377).

Source keys (all under `/tmp/claude-0/-home-user-caplet-investment/9a6d3111-0f82-5d56-a545-e37650a2edcf/scratchpad/oct20/` unless shown; `file:line`): **RBK** `verify_runbook/runbooks_checked.md` · **PM2V** `verify_pm2/verify_pm2.md` · **M1** `out/Caplet_M1_Meeting_Pack_20Oct2026.md` · **KIT** `out/Caplet_TNA_Fact_Kits_v2_20Oct2026.md` · **WQ** `out/Caplet_Wharton_Questions_SendToday_20Oct2026.md` · **CM** `compliance/compliance_matrix.md` · **TC** `tradecheck/trade_check_pack.md` · **EXP** `exposure/exposure_audit.md` · **FWD** `forward/forward_view.md` · **FRP** `verify_frblue/fr_prep_v2_checked.md` · **ATT** `artic_fixed/attribution_pack_checked.md` · **OPS** `ops/operating_plan.md` · **TL** `timeline/timeline.md` · **QV2** `askwharton2/questions_v2.md` (self-checks A-L, which RBK and WQ cite) · **CL** `/home/user/caplet-investment/CLAUDE.md` · **COMP** `/home/user/caplet-investment/COMPETITION.md`. [v2] **AIP** `oct19/office/web/ai_policy_2026-10-19.txt` · **TNA** official `2026_WGY_Trading_Notes_Analysis-FINAL.txt` · **RR** `compliance/web/rules_roles.txt` · **GYF** `compliance/web/gy_faq.txt` · **AIS** `aistatement/ai_statement.md` · **VLC** `verify_logincheck/verify_logincheck.md` (the v1 check) · **VTR** `verify_trade/verify_trade.md`.

Banner corrections applied. SMApply: the three-case rule (RBK:393-408) replaces the older "never press application-level Submit" (PM2V:56 E5, M1:55 states the correction). GitHub: [v2] order: screenshot Traffic and Forks, then the fork owner deletes the fork, then the repo goes private (EXP:3 X1, X4; M1:57); "Allow forking" does not exist for a personal repo (EXP:3 banner X2). WInS: a buy that is short of cash can be shrunk or "System Cancelled" (TC:3). [v2] The official page says orders placed while the market is closed are filled at the opening price when the market reopens (`/home/user/caplet-investment/competition/official/2026_27/smapply_public_2026-10-14/trading.txt:33`, `:52`; ATT:10 A9). The exact freeze cut-off is UNVERIFIED (ATT:12 A11; FRP W0).

Rules for every check below

- **Read-only.** Open, read, screenshot, close. Nothing is typed into a form, ticket or setting unless the row says so.
- **WInS screens: the team leader (Ray) clicks, read-only, no orders.** [v2] For screens this is **a proposal for the M1 roles vote (DL-02/DL-04), not a rule**; only orders are Ray's alone (CL). Anyone else watches by screen-share and records. Several source files name other roles at the WInS keyboard: the paste checker (RBK:496 A3), the trade-log keeper (OPS:220; RBK:555 B15), the rules lead (CM:115, :211-215) and the rules lead plus the trader (TC:549). In this list those roles **watch, direct and file**, and Ray clicks. [v2] Exception for the Trade Notes (rows 16, 27): the paste checker (named at M1; not the submitter) copies the notes from WInS on screen-share while Ray clicks, so Ray is never both submitter and paste checker (RBK:496 A3; PM2 action 1; M1 DL-02 "paste checker and submitter or author"). If adopted, the historian logs that RBK A3/B15 and OPS:220 were changed by vote.
- **SMApply: the team leader's own account and device.** Nobody else logs in as the leader (RBK:449). The witness watches on screen-share.
- **Capture naming:** `YYYY-MM-DD_<system>_<screen>_NN.png`, where `<system>` is one of `smapply`, `wins`, `mail`, `gdoc`, `gdrive`, `gsheet`, `github` or `leadermac`. On submit days add the Sydney time, e.g. `2026-10-22_smapply_tna_status_2005AEDT_01.png`. Store captures **only on the team's private Drive**, in a "Login checks" folder, with a second copy on the deputy's drive for submit-day files (RBK:507). **Never put them in the public repo.** Crop the WInS username, account number, email addresses and surnames before a file goes anywhere else (RBK:507).
- [v2] **Tonight's order (Tue 20 Oct):** #2 → #1 → #3 → #4 → batch 1 goes at 22:00 (sent anyway if a check is unfinished, WQ:13) → #5 → #6; #4a (advisor), #7 and #10's edit-access part also by 22:00. Ray is at the keyboard after M1 (20:00-20:30).
- **Record:** the historian logs each row as done, with the Sydney time, the capture names and the answer in one line. A blank answer stays blank. Nobody fills one from memory or guesswork (TL:9-11).

The list (ordered by deadline; 30 items: [v2] row 4a added, rows keep their v1 numbers)

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
1	**SMApply, logged in → Pages tab → Deliverables**, plus **Trading Details** and any "trading requirements" page. Look for (a) the "complete Trading Notes Analysis Requirements" and (b) any definition of "required trading activity" or a first-trade date	TNA format rules rest on the public copy only (RBK:476 P1 self-check A; RBK:46-50). "Required trading activity" is undefined in public (CM:115 row 13; TC:78 R13). "First trade by Oct 10" is unverified ([v2] CL:138; open item CL:150). QV2:139 (A)	Team leader at the keyboard; rules & format lead reads and records	[v2] **Tue 20 Oct 21:30** (batch 1 goes at 22:00, sent anyway if a check is unfinished, WQ:13)	`2026-10-20_smapply_pages_deliverables_01.png`, `..._smapply_pages_trading_01.png`; save any linked PDF	**Activity defined:** drop batch-1 item 3 (WQ:25-28). Compare the 11-trade book with the definition and take any gap to a team vote. Never trade for a count without a vote (TC:184). **Extra TNA format rules found:** they override RBK §0 item 1's "house style" (RBK:46-50). **Nothing found:** send item 3 as planned

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
2	**SMApply → My Applications → the application → task list.** For TNA, IPS and Final Report, note: shown or not; "Not started", "Complete" or "cannot be started at this time"; whether **Review & Submit** is shown and active; the deadline displayed. Then **open the TNA task without pressing anything**: number of fields, character limits, ticker/date/time/quantity fields, text box or upload (types, size), help text, any AI-use or comments field, the button names. [v2] Also **any declaration, AI, integrity, originality or terms box or text**: copy its exact words and screenshot it; **do not tick it before the team decides**. (The Wharton "Statement of AI Use" is a section heading on the AI Policy page, not something to sign, AIS §1; any box on the form is separate SMApply text.) [v2] Note whether the application offers a "collaborator" option; do not use it without a vote and Wharton's answer to batch-1 item 4 (GYF:252). [v2] **Screenshot the task list before and after opening each task**; any change in status is recorded, not acted on (RBK:394-396). Open the IPS task if it is visible (PDF only, 5 MB, encrypted files refused). **Roster:** which buttons the roster took and what My Applications shows for it now	Decides which button submits the TNA, under the three-case rule (RBK:51-63, :380-412; M1:55). Form fields decide how the paste is built (RBK:501 A8; KIT:750). Gate P1 (RBK:476). CM:118 row 16; OPS:187, :324 R7; QV2:141 (C); WQ:33-37	Team leader at the keyboard; rules & format lead records; deputy watches	[v2] **Tue 20 Oct 21:30** (before batch 1 at 22:00); latest Wed 21 Oct 20:00 (M2)	`2026-10-20_smapply_tasklist_01.png`, `..._smapply_tna_form_01.png` (one per screen and help text), `..._smapply_ips_form_01.png`, `..._smapply_roster_status_01.png`; a written note of the roster buttons; [v2] `..._smapply_tasklist_before_01.png` / `..._after_01.png`; `..._smapply_tna_declaration_01.png` and its exact text, if any	**Case 1** (TNA the only open task, Review & Submit active): Submit is the TNA submission. **Case 2** (Submit missing or blocked): Mark as Complete, then Contact Us to confirm receipt. **Case 3** (IPS/FR tasks open and editable, Submit active): Mark as Complete only, ask Wharton, vote at M3 (DL-15) (RBK:397-408). **Text boxes:** one plain-text file per field. **Upload:** export the PDF and run the PDF gate (RBK:501). **A note field limit under 294 characters:** stop and Contact Us (RBK:457). **AI field:** DL-16 vote on a student-written line (RBK:432). [v2] **A declaration or terms box exists:** its exact text goes to the DL-16 vote with the AI-use rows; nobody ticks it before the vote. If it blocks Submit, raise it at M3 before Thursday. **Deadline not shown as Sat 24 Oct 08:00:** [v2] first read the SMApply profile time zone; if it is not Sydney, the display is not evidence, so screenshot both. Otherwise screenshot it and ask (RBK:409-412). **Form answers WQ item 5:** drop item 5
3	**WInS dashboard → the "Week 1 email" PDF** (a download) and the **messages/announcements area** (mail or bell icon; exact label UNVERIFIED). Open every weekly email since 29 Sep. [v2] Record the date shown on each PDF or message	It may define "required trading activity" (CM:115 row 13, :213). It may hold the 6 Oct email (row 4). QV2:140 (B); TL:120 row 34 ("not read here")	**Team leader (Ray) only**; rules & format lead reads along on screen-share	[v2] **Tue 20 Oct 21:30** (before batch 1)	Save each PDF as `2026-10-20_wins_weekly_email_wk1.pdf` (wk2, ...); `2026-10-20_wins_dashboard_messages_01.png`	**Activity defined:** as row 1. **New instruction for the TNA or IPS:** add it to the RBK checklists before the Thu 16:00 lock. **6 Oct email found here:** use its time in row 4

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
4	**The team's Wharton-registered inbox** (school mail, spam and other folders included; also SMApply messages if any). Find the 6 Oct "Week-2" email. Record its **exact text and arrival time** (Sydney and ET). [v2] Also **the Week-One email and each later weekly email**: sent and arrival time (Sydney and ET), in the inbox or SMApply messages	The IBTM "refined" label is allowed only if the email arrived before the IBTM order at 10/06/2026 10:01:41 PM ET (= Wed 7 Oct 13:01 Sydney) (KIT:265-267; TL:252 G7; PM2V:64 E13; CM:217). The email is quoted only in COMP:87-90 (CM:28 EM2). M1:62. [v2] Weekly emails go via SMApply, with copies on WInS (GYF:270); their dates set any activity rule against the 7-8 Oct trades and fill the Articulation timeline (VLC §5 item 3)	Inbox owner (team leader); rules & format lead records	**Tue 20 Oct 22:00**; latest Wed 21 Oct 20:00 (M2, DL-13)	`2026-10-20_mail_week2_email_header_01.png` (sender, date and time visible; recipient addresses cropped); save the email as a PDF; [v2] `2026-10-20_mail_week1_email_header_01.png` and one per later weekly email	**Arrived before the IBTM order:** "refined" may go to the DL-13 vote. **After, or not found:** drop the claim (PM2V:188 action 3). **Text differs from COMP:87-90:** correct every file that quotes it
4a	[v2] **The advisor's own accounts, read-only, signed in as themselves**: (a) **SMApply**: what the advisor's view shows for the TNA, IPS and FR status (whether it shows status at all is UNVERIFIED); (b) **the advisor's inbox**: the Week-One and 6 Oct emails, with arrival times (Sydney and ET); (c) that batch 1 was copied to the advisor. The advisor does not open WInS as the team	A second confirmation that does not depend on the leader, and a fallback if the leader's inbox lacks the emails. The advisor "will be able to see team login information and their activity report" (GYF:268); the advisor and the leader are "the main points of contact" (GYF:270); advisors monitor "team engagement and portfolio activity" (RR:245). Batch 1 copied to the advisor (WQ:42; PM2 action 5). VLC §5 item 2	The advisor, in their own account; they decide nothing ("may not make decisions on behalf of students", RR:240), only capture and pass files to the historian through the private Drive	(b) **Tue 20 Oct 22:00**; (c) Wed 21 Oct 12:00; (a) after each submit, with rows 17, 26 and 29	`2026-10-20_mail_advisor_week1_header_01.png`, `..._mail_advisor_week2_header_01.png` (addresses cropped); `2026-10-22_smapply_advisor_tna_status_01.png` (and IPS, FR)	**Advisor's copy arrived earlier than the leader's:** use the earlier time in row 4 and note both. **Leader's inbox lacks an email:** the advisor's copy is the record. **Advisor's status differs from the leader's:** Contact Us (as row 17). **Batch 1 not copied:** forward a copy, logged

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
5	**The leader's machine → Claude desktop app → scheduled tasks list** (exact menu label UNVERIFIED). Check each of the 10 `caplet-*` tasks (`ops/routines/scheduled_tasks/`): enabled or paused, last run, next run. Also check: whether the routine browser holds a logged-in WInS or SMApply session; whether `caplet-judge-tna` ran (about 18-19 Oct) and where its output went; which AI browser product worked WInS on 7 Oct; whether any deny rules exist in that machine's Claude settings	The routines may read logged-in WInS and SMApply ([v2] `ops/routines/MONITOR.md:23`; `ops/routines/WATCHER.md:12`). This conflicts with "no AI near WInS/SMApply" (PM2V:60 E9, :189 action 4d; M1:56). [v2] Routine runs per COMP:29-30: mock-judge TNA 19 Oct, **TNA gate 23 Oct** (`caplet-tna-final-check`, MONITOR mode, which may READ a logged-in WInS session), mock-judge IPS 1 Nov, **IPS gate 6 Nov**, mock-judge FR 22 and 30 Nov, **final gate 4 Dec**. Paths: `ops/routines/MONITOR.md:23`, `ops/routines/WATCHER.md:12`. Status UNVERIFIED (PM2V:222). AI-use rows L11/L13 (TL:287, :289) and R20 "product name" (RBK:424)	Whoever runs the routines on the leader's machine (team leader); historian logs	**Tue 20 Oct 22:00** (logged by Wed 21 Oct 08:30); [v2] re-check **Thu 22 Oct 08:00** (before the 23 Oct gate run), Sat 31 Oct, **Thu 5 Nov 08:00** (before the 6 Nov gate run), Sat 21 Nov and **Thu 3 Dec 08:00** (before the 4 Dec gate run)	`2026-10-20_leadermac_scheduled_tasks_01.png` (task names and status only); a one-line note per question	**A task is enabled and DL-01 says pause:** pause it and log the time. **`caplet-judge-tna` ran:** it becomes an AI-use row. Authors and scorers do not open it before the scorers mark (OPS:191). **The browser was logged in:** log the AI reads and sign that browser out of WInS and SMApply. **Product found:** fill R20. **No deny rules:** note it for DL-01 (OPS:262)
6	**GitHub, repo owner's account → Insights → Traffic** (views, unique visitors, clones, referring sites, popular content) and **Insights → Forks**. Then **Settings → Collaborators** and **Settings → GitHub Apps / Integrations**	Traffic is the only evidence of outside visits or clones, and it disappears once the repo is private on GitHub Free (EXP:3 X4, :170 step 1). Collaborators and stargazer UNVERIFIED (EXP:30, :226-227). Apps: EXP:174 step 5. Order: Traffic, then the fork is deleted, then the repo goes private (M1:57; PM2V:189 action 4)	Repo owner (team leader); privacy lead records	**Tue 20 Oct**, before any visibility change	`2026-10-20_github_traffic_01.png`, `..._github_forks_01.png`, `..._github_collaborators_01.png`, `..._github_apps_01.png` (usernames cropped if the file leaves the private folder)	**Referrers from search engines or unknown sites:** the privacy lead plans removal requests (EXP:182 step 13) and puts the history-rewrite decision on the Sun 25 Oct agenda (EXP:179). **Unknown collaborator:** remove them. **Unneeded app:** remove it, and log the use of any app kept

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
7	**IPS Report Doc → Comments panel (top right)**: list every pending suggestion with its author and tab. Then **Tools → Review suggested edits** on each tab. Note the "Last edit" time. **Before the real clean-up**, test in a **new blank test Doc** (File → New, never Make a copy): put a suggestion in each of two tabs, press Reject all in one tab, and see whether the other tab's suggestion survives. [v2] Create the test Doc **in the same school account** that owns the IPS Report, titled "TEST reject-all scope - not a team file"; **close the IPS Report tab first** and check the title bar before pressing; keep the test Doc out of the team folders and unshared. **Simpler alternative:** reject the 10 suggestions by hand, one at a time (PM2 action 2); the test can then wait until after Thursday	The guard before "Reject all" (RBK:155-161). Reject-all scope across tabs is UNVERIFIED (RBK:564). The 10 v12 suggestions are pending, and the Doc has been unchanged since 18 Oct 00:49 UTC (RBK:68; PM2V:41). DL-05 (M1:54); action 2 (PM2V:187)	Editor, signed in as themselves; deputy watches	**Tue 20 Oct 22:00** (clean-up deadline)	`2026-10-20_gdoc_ips_suggestions_list_01.png`; `..._gdoc_rejectall_scope_test_01.png`; after clean-up, `..._gdoc_ips_review_empty_<tab>_01.png` for each tab	**A student suggestion exists:** its author settles it first, one at a time, then a version is named (RBK:158-161). **The test shows Reject all is document-wide:** reject AI suggestions only after every student suggestion is settled. **Tab-only:** run it on every tab. **"Last edit" is newer than 18 Oct:** stop and re-read before acting
8	**Each writer's own Google account**: signed in as themselves (avatar, top right) in the student tab; Docs "Help me write"/Gemini off; Grammarly's generative features and any rewrite button off	Version history is the authorship record only if each student types signed in as themselves (OPS:258-261; RBK:181-182)	Each author and scorer checks their own; historian ticks	**Tue 20 Oct night**, before the first drafts (OPS:188)	No screenshot needed; the historian logs a tick and the time for each student	**A feature was on while drafting:** log it as AI use in the AI-use log, and the author rewrites the affected text from their own notes (OPS §5B)
9	**WInS → Order History** (filled and cancelled) and **Transaction History**: the 11 fills (date, time, price, quantity), the four cancelled-and-re-placed orders, and the accrued interest charged on each bond. Also open **Trade Notes** and check whether IBTM, IBTR or VT shows **more than one note** (an "Add Note")	Gate P4 (RBK:479). Fill times are UNVERIFIED (KIT:143, :324, :447, :622; TL:254 G9; QV2:148 J). The cash gap of about $251 needs the accrued interest per bond (ATT:369-381). Trade Log rows (COMP:198; OPS:189). A second note would change "exactly as it appears" (QV2 E18; TC:559 item 8)	**Team leader (Ray) only**; trade-log keeper watches and fills the Trade Log	**Wed 21 Oct 12:00**	`2026-10-21_wins_order_history_01.png`, `..._wins_transaction_history_01.png`, `..._wins_trade_notes_01.png` (username cropped)	**Fills match the record** (IBTM 4,503, IBTR 853, VT 167; fills at the reopen): use them only if the form asks (row 2). **Any mismatch:** stop and re-check the kit identifiers. **May-2038 accrued on a Feb/Aug basis:** the $225 explanation holds (ATT:369). **A second note on a pick:** ask Wharton which one to quote, before Thu 16:00

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
10	**Google Drive → Share** on each team file (IPS Report, Final Report, Strategy Notes, Notes & Discussions, Portfolio and Trading Notes sheet, PM Dashboard, Team List): owner account; all six students as Editors; General access = Restricted. [v2] Also the General access of the three folders, "Caplet Investments", "AI Outputs" and "Knox Wharton 2026" (TL:19-20; EXP:89). Also the **three 2025 files** that are open to anyone with the link: find the owner and their General access setting	One school account owns every file, which is a single point of failure (OPS:321 R4). Editors are needed to type signed in as themselves and to see history (RBK:148). Link-open 2025 files: EXP:82-91, :180 step 11; owners UNVERIFIED (PM2V:226)	The owning account's holder; privacy lead records	[v2] **Edit access for the three authors and two scorers: Tue 20 Oct 22:00, before drafting** (OPS:188). Owner, Restricted, the folders and the other files: **Wed 21 Oct 18:00**. The 2025 files by **Sun 25 Oct** (PM2V:189 action 4e)	`2026-10-21_gdrive_share_<file>_01.png` (emails cropped outside the private folder)	**A student lacks edit access:** the owner adds them before drafting. **Any file is "Anyone with the link":** the owner sets it to Restricted. **A 2025 file is owned outside the team:** the team asks that owner to restrict it
11	**SMApply login on a second device and network** (phone hotspot or school network); account email **verified**; SMApply's no-reply sender added to safe senders. [v2] Also **the leader's communications opt-in**: SMApply profile/notification settings (or wherever the opt-in was given; location UNVERIFIED) show the leader opted in to receive communications	An unverified email can block Submit (RBK:348-350, :365-368). Backup if the device or network fails (OPS:334 R17). QV2:150 (L). [v2] "The student team leader must opt-in to receive communications" (RR:218); needed before Wharton's batch-1 reply and the 9 Nov instructions	Team leader; deputy watches	**Wed 21 Oct 22:00**; [v2] the opt-in by **Tue 20 Oct 22:00**, with row 2	`2026-10-21_smapply_login_device2_01.png` (email cropped); [v2] `2026-10-20_smapply_optin_01.png`	**Login fails:** fix it now and Contact Us. **Email unverified:** verify it now. **Both fine:** this row is the fallback for RBK:461. [v2] **Opt-in off or not found:** turn it on now (leader only) and log the time; if it cannot be found, add it to the next Contact Us message
12	**Docs behaviour tests in a new blank test Doc** (never a copy of a team Doc): (a) TNR 12, double, 1-inch margins, Pages, Letter → File → Download → PDF Document → **Current Tab**, then run `pdfgate.py`; (b) add a comment and a suggestion, export, and see whether either prints; (c) two tabs with different page setups, to see whether page setup is per tab or per document; (d) **Tools → Word count** on test strings (co-sponsors, 2033-2042, IBTM/IBTR, rates — and, rates — and)	`pdfgate.py` was never run on a real Docs export (RBK:573-575). Whether comments print is UNVERIFIED (RBK:64-66, :565). Page setup scope is UNVERIFIED (RBK:197-198). How Docs counts hyphens is UNVERIFIED (RBK:249-251, :567)	Editor and rules & format lead	**Wed 21 Oct 22:00**	`2026-10-21_gdoc_test_export.pdf` + saved pdfgate output; `..._gdoc_wordcount_test_01.png`	**pdfgate misreads a real export:** rely on the second-device read and the Docs settings (RBK:342-343). **Comments print:** resolve every comment before the export. **Setup is per tab:** set it on the submission tab itself. **Docs counts differently from `textcheck.py`:** the strictest count still wins (RBK:260-262)

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
13	**AI corpus downloads** (signed in): IPS Report tabs as File → Download → Plain text, Current Tab (V1-V5, Trading Note Reflection, Tab 10, Tab 15, and the accepted-all preview of V5); Drive "AI Outputs" exemplars v3, v7, v12, v13, v14 and the insight files; the Sheet's Trading Notes tab and R&B Tickets as CSV	The provenance check needs the full AI corpus (RBK:294-306). Gates P6 and P8 (RBK:481, :483)	Editor	**Wed 21 Oct 22:00**	The files themselves, in a private "AI corpus" folder (not screenshots); a list of what is in it	**A file is missing or unreadable:** note the gap in the log. The provenance result then covers less, so say so
14	**Team inbox: Wharton's reply to batch 1** and any automatic copy from Contact Us	A reply can only change Thursday if it lands by about Thu 22 Oct 08:00 (WQ:5). Whether Contact Us sends a copy is UNVERIFIED (RBK:569-570)	Inbox owner (team leader); rules & format lead reads	**Thu 22 Oct 08:00**; again 16:00	Save each reply as `2026-10-22_mail_wharton_reply_01.pdf`	**AI-use answer:** decides DL-16's disclosure line (RBK:432). **Word counting:** replaces the strict defaults (RBK:253-262). **Leader cannot submit:** updates the R2 plan (RBK:449). **Form answer:** settles the three-case choice. **No reply:** the defaults stand
15	**Version history for the TNA AI-use rows**: IPS Report → **File → Version history → See version history** (show changes) for 17-18 Oct (who replaced V5 with exemplar v11; who cut it; which account shows for the v12 suggestions ([v2] 10 per RBK:68; TL:176 counts 20 tracked changes; row 7's inventory records the true count) at 11:49 AEDT 18 Oct; any student review). **Portfolio and Trading Notes sheet → version history** for the Trading Notes tab, 30 Sep-7 Oct (who typed each note draft; when the "Exemplar note", "Proposed note - AI draft" and 6 Oct AUDIT REVIEW columns appeared)	Rows R12, R19, R21 and R29 need "who" filled before the TNA. "unknown - team to fill" is not allowed (RBK:416-427, gate P7 :482). TL:176 row 75, :253 G8, :261 G16; KIT:144-145. History needs edit permission (RBK:148); the connector cannot read it (TL:317)	Historian with the editor (both with edit access)	**Thu 22 Oct 16:00** (DL-16)	`2026-10-22_gdoc_ips_versionhistory_<date>_01.png`, `..._gsheet_tradingnotes_versionhistory_01.png` (kept private; display names visible)	**An account is shown:** the row records that account and that the text was AI. History shows the account, not who sat at the keyboard or which tool, so the student's own memory fills the rest. **Nothing shown and nobody remembers:** write "not recorded" (TL:9-11)

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
16	**WInS → Trade Notes**: copy the three notes **as plain text** into `ref_IBTM.txt`, `ref_IBTR.txt` and `ref_VT.txt`. Find each by security and ET order time: IBTM 10/06 10:01:41 PM; IBTR 10/07 04:42:53 AM (the "about 0.2" note, not the cancelled "0.3" one); VT 10/07 08:27:19 PM	TNA:44 "exactly as it appears in WInS". Length is no proof: 288 and 294 characters are each shared (RBK:496-497 A3-A4; KIT:744-747; QV2:149 K)	[v2] Ray clicks the WInS screens on screen-share; the **paste checker (named at M1; not the submitter) copies the notes from WInS on screen-share while Ray clicks**, ticks each `ref_*.txt` against the shared screen character by character, then runs `textcheck.py --compare`. Ray is never both submitter and paste checker. Final role choice: **M1 roles vote (DL-02/DL-04)**; if it changes RBK A3, the historian logs that	**Thu 22 Oct 16:15-16:45**	The three `ref_*.txt` files; `2026-10-22_wins_trade_notes_01.png` (username cropped)	**Exact match YES** and 292/294/288 characters: go on to A5. **NO:** re-copy from WInS, never from a Doc (RBK:454-456). **The text differs from the 13 Oct copy:** stop and Contact Us

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
17	**TNA submit, SMApply**: the Preview; copy-back from each form field; the message after the button; the task list status; My Applications; **More Options → Download** of the application. **Re-checks:** status unchanged, plus a confirmation email (spam too). [v2] Only after DL-15 is logged; press only the button the three-case rule picks (RBK:505 A12)	RBK:504-509 (A11-A16). The confirmation email depends on the site's setup (RBK:365-366). Failure table RBK:445-461. OPS:197	Team leader submits; deputy watches; paste checker does the copy-back	**Thu 22 Oct 19:15-20:15**; Fri 23 Oct morning; **Sat 24 Oct 09:00**	`2026-10-22_smapply_tna_preview_01.png`, `..._smapply_tna_after_button_2000AEDT_01.png`, `..._smapply_tna_tasklist_01.png`, `..._smapply_myapplications_01.png`, `2026-10-22_smapply_tna_download.pdf`; `2026-10-24_smapply_tna_status_0900AEDT_01.png`, `2026-10-24_mail_smapply_confirmation_01.png`	**Status shows complete/submitted:** done; log it (A15). **Status unclear:** Contact Us before Fri 23 Oct 08:00 Sydney (RBK:452). **No email:** the status screenshot plus the download is the record; do not resubmit (RBK:453)
18	**WInS → Portfolio Summary (W1) and positions (W2)**, then Transaction History (W4). Check whether the **total includes bond accrued interest** (total vs holdings × displayed prices), whether May-2038 shows last coupon 15 Aug, and which day's ETF prices are shown. **Repeat weekly**	Self-check F (QV2:144). The screen may differ from the model by about $1.5k for accrued, $225 for May-2038, and $1-1.6k for ETF timing (ATT:348-358; FWD:202-210). Tracking-template rows (ATT:323-336). Weekly captures (FRP:581, :585, :590, :594). The 16 Nov coupons, and whether May-2038's $450 is paid 16 Nov or 15 Feb (ATT:381, :391)	**Team leader (Ray) only**; the trade-log keeper types the values into the template	First **Sat 24 Oct from 08:00** (23 Oct close; F due **Sun 25 Oct**). Then Sat 31 Oct, Sat 14, 21 and 28 Nov, and Wed 2 Dec from 08:00	`2026-10-24_wins_portfolio_summary_01.png`, `..._wins_positions_01.png`, `..._wins_transaction_history_01.png` (username cropped)	**The total includes accrued:** quote WInS totals on that basis. **It excludes it:** quote the ex-accrued basis. Either way, give date, source and basis (ATT:358). **May-2038 coupon not paid 16 Nov:** the Feb/Aug explanation is confirmed (ATT:378-381). **Values far from the model:** log WInS minus model, never "return"

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
19	**WInS → Portfolio Summary → Session Rules**: position limit, day-trading line, minimum price, fractional shares, commission, trade count, trade-note box limit, end/freeze time	Only a typed 29 Sep record exists. The public rules changed twice on 14-19 Oct (TC:26-28, :496-497 item 2; CM:155 row 43; CL:137, :147; QV2:142 D). The exact freeze time is UNVERIFIED (OPS:38)	**Team leader (Ray) only**; rules & format lead records	**Sun 25 Oct** (before the M5 vote Tue 27 Oct); re-shot at the freeze (row 27)	`2026-10-25_wins_session_rules_01.png` (username cropped)	[v2] **Per-ETF (per-position) limit below 34.2%:** card T6 fails (IBTM 34.2%). **All-bonds limit below 45.0%:** card T3 fails (all bonds 45.0%) (TC:3; VTR E2). **Any limit below a position the book already holds** (IBTM filled at about 32.5% of the book on 7 Oct, TC:71): screenshot it, do not trade to fix it, put it to a team vote and Contact Us. **Minimum price differs from $3:** note it (no stock is held or planned). **Day-trading definition differs:** keep the two-evening sequence. **Note box under 300 characters:** shorten any new note draft. [v2] **Note limit not shown on Session Rules:** do not open a ticket to find it; check it at the ticket in row 23, only if a trade is voted (CM:155). **End time shown:** replace the UNVERIFIED freeze time in OPS and RBK
20	**GitHub, each committing student's account → Settings → Emails**: "Keep my email addresses private" and "Block command line pushes that expose my email". Also confirm the repo shows **Private** and the fork is gone	A personal email sits in 3 commits (EXP:12, :175 step 6). Action 4e (PM2V:189). The fork must be deleted before the repo goes private (EXP:3 X1)	The fork owner and any other committer; privacy lead records	**Sun 25 Oct**	`2026-10-25_github_email_settings_01.png` (address cropped); `..._github_repo_private_01.png`	**Boxes unticked:** tick them; new commits stop exposing the address (old ones stay unless the history decision says otherwise). **Repo still public, or fork still there:** escalate to the owners at M4
21	**Version history for the IPS-era AI rows**: IPS Report → See version history for the V1-V5 tabs, Tab 10 (14 Oct) and Tab 15 (Chinese edit notes); the authors of the 13 Oct comments (including "humanise V3"). Also **Drive search** for the 27 Sep team-notes Doc (where it is now, and its owner)	R10, R17 and R18 need tool and user (RBK:428). G3, G14 and G15 (TL:248, :259-260); TL row 61. DL-36 needs complete IPS rows (RBK:547 B7)	Historian with the editor; each student confirms their own rows	**Sun 25 Oct 17:00** (back-fill, OPS 4b); hard stop **Thu 5 Nov 09:00**	`2026-10-25_gdoc_ips_versionhistory_<tab>_01.png` (private)	**The account is found:** fill the row and the student confirms the tool. **Unknown:** write "not recorded". **The team-notes Doc is found:** add it to the AI corpus or evidence list

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
22	**WInS → Getting Started** (user guide, FAQs, tutorial): how bond volume shows; which order types bonds allow; whether open orders reserve cash; whether a pre-open Day order stays valid. **Do not open an order ticket for this check**	The bond volume rule is UNVERIFIED (TC:68 R3, :553). Buying-power behaviour (TC:77 R12, :554). Order types (TC:330, :556). QV2:143 (E)	**Team leader (Ray) only**; rates analyst reads along	**Tue 27 Oct 20:00** (M5)	`2026-10-27_wins_getting_started_01.png`	**The guide settles bond volume:** S1 is not sent. **Open orders do not reserve cash:** keep sale-then-buy on two evenings (TC:519). **Silent:** settle it at the ticket in row 23
23	**Only if a trade is voted (M5/M6):** WInS Order History shows no open orders; a search of the security (IBTM full name "Dec 2032", not IBTN; the bond's coupon 3.125%, maturity 15 Nov 2041, last coupon, accrued); the live bond price yield-checked against treasury.gov; the preview total read aloud; next morning, the fill and cash. The order itself follows TC §6, not this list	TC:495-527 (items 1-13), TC:548-556 (§7 items 1-5); OPS:210, :217. A buy short of cash can be shrunk or System Cancelled (TC:3)	**Team leader (Ray) only** at the keyboard; trade-log keeper confirms the preview	Thu 29 Oct 22:00 / Fri 30 Oct 22:00; fallback up to **Wed 4 Nov 22:00**	`2026-10-29_wins_preview_01.png`, `..._wins_order_history_filled_01.png`, `..._wins_cash_after_01.png`	**Implied yield more than 0.25 points off the curve:** STOP (TC:3). **Preview total off the ticket by more than $100:** do not place it. **Sale not filled:** do not place the buy
24	**SMApply → the submitted roster confirmation**: the exact team name and each member's first name as submitted. **WInS login screen**: the team username, kept in the private record only	The IPS title page must match the roster character for character, and the username line is required (RBK:525-527 F2-F4; CM:147 row 35; QV2:147 I). G10 (TL:255)	Team leader (SMApply; WInS = Ray only); rules & format lead compares	**Tue 3 Nov 18:00** (format gate); can be done with row 2	`2026-11-03_smapply_roster_confirmation_01.png` (**private Drive only**; holds personal data)	**The roster spelling differs from the draft:** use the roster's. **The username is in any public file:** remove it (PM2V:61 E10)
25	**WInS search box and bond drop-down for every security the IPS or Final Report names**: IBTM-IBTR, VT, the five held T-bonds, SGOV, BIL, SHV, 5.000% May-2037, 1.375% Nov-2040, 2.000% Nov-2041, 4.5% Feb-2036; any Treasury maturing strictly between 15 Feb 2031 and 15 Feb 2036; IEF/TLT if used as an alternative	Investments must be on WInS "for BOTH contributions" (CM:129 row 22; FRP:297 R27). SGOV was seen 29 Sep with no screenshot (FRP:631). C4's "no single 2032 Treasury" needs a re-check (FRP:412, :703). ATT:250. QV2:146 (H)	**Team leader (Ray) only**; rules & format lead ticks the list	**Tue 3 Nov 18:00** target; hard **Thu 5 Nov 09:00** (IPS lock); re-check before the Final Report	`2026-11-03_wins_search_<ticker>_01.png` for each one	**Not listed:** it cannot appear in Laura's plan; pick a listed one. **A 2031-2036 Treasury is listed:** C4's reasoning changes before it is used

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
26	**IPS submit, SMApply**: before the upload, the task status and the deadline displayed (Sat 7 Nov 09:00); after the upload, **download or preview the uploaded file** and open it; the message after the button; the task list; My Applications; More Options → Download. **Re-check** status and email. [v2] Before the upload, any declaration, AI, integrity or terms box: exact words and a screenshot; nobody ticks it before the team decides (DL-36/38 vote; AIS §1)	RBK:550-552 (B10-B12), :556 (B16). OPS:119, :219	Team leader submits; deputy and paste checker watch	**Thu 5 Nov 19:15-20:15**; [v2] **re-check Fri 6 Nov 08:00** (if the status is unclear, Contact Us before Sat 7 Nov 01:00 Sydney = Fri 6 Nov 9:00 am EST); **Sat 7 Nov 09:30** (record)	`2026-11-05_smapply_ips_upload_check_01.png`, `..._smapply_ips_after_button_2000AEDT_01.png`, `..._smapply_ips_tasklist_01.png`, `2026-11-05_smapply_ips_download.pdf`; `2026-11-07_smapply_ips_status_0930AEDT_01.png`	**Upload error:** follow RBK:448. **Uploaded file differs from the gated PDF:** stop and re-upload the gated file. **Three-case rule:** apply what the TNA submit showed (RBK:551). [v2] **A declaration box exists:** its exact text goes to the vote; nobody ticks it before
27	**WInS freeze saves**: Order History (cancelled orders included), Transaction History, Trade Notes, Portfolio Summary, positions, Session Rules, May-2038 detail. Also check (a) Transaction History for the **iBond distribution** (about $601; ex 2 Nov, pay 5 Nov) and its credit date, and (b) whether **login still works after the freeze**	The Final Report evaluates implementation from these records. Access after 6 Nov is UNVERIFIED (QV2 Q7; WQ:49). OPS:220; RBK:555 B15; FRP:572 W0. Self-check G (QV2:145); ATT:385-387	Ray clicks ([v2] screens: proposal for the M1 roles vote); trade-log keeper names and files the captures. [v2] For Trade Notes, the paste checker (named at M1; not the submitter) copies the notes from WInS on screen-share while Ray clicks; final role choice at the M1 roles vote (DL-02/DL-04)	Thu 5 Nov evening; **Fri 6 Nov evening**; **Sat 7 Nov after 08:00**; login test again Mon 9 Nov	`2026-11-06_wins_order_history_01.png` (and so on for each screen); `2026-11-07_wins_transaction_history_postfreeze_01.png` (username cropped)	**Distribution not credited by the freeze:** record that, and never trade to reinvest it (ATT:387). **No access after the freeze:** the Final Report uses only the saved files, and weekly captures (row 18) stop. **Access works:** weekly captures go on

#	What to check (exact screen/page path)	Why it matters (deliverable/decision; source)	Who (role)	By when (Sydney)	What to capture	What changes depending on the answer
28	**SMApply → Pages → Deliverables** and the application task list: the **Final Report instructions** and the FR task (fields, upload, separate school-letter file). [v2] Any declaration, AI, integrity or terms box: exact words and a screenshot; do not tick it before the team decides (AIS §1)	Instructions "shared on November 9" may appear from Mon 9 Nov 16:00 Sydney (FRP:575; OPS banner). They replace every FORECAST row (FRP:28, :576)	Team leader at the keyboard; rules & format lead copies them	From **Mon 9 Nov 16:00**; by **Tue 10 Nov 18:00**	Instructions saved verbatim with the fetch time (`2026-11-09_smapply_fr_instructions.pdf`); `..._smapply_fr_task_01.png`	**Out by Tue 18:00:** release-day drill, then M11 Tue 10 Nov. **Not out:** M11 moves to Wed 11 Nov (FRP:577). **Gaps:** batch-3 questions by Fri 13 Nov
29	**Final Report and school-letter submit, SMApply**: the upload checks as in row 26, for two files; the message after the button; task list; My Applications; Download. **Re-check** status and email. [v2] Only after DL-53 is logged; three-case rule as learnt at rows 17/26. Any declaration box: exact text to the vote; nobody ticks it before	FRP:595 (M16); OPS:126, :240; the letter goes as a separate file	Team leader submits; deputy watches	**Wed 2 Dec 19:00-20:15**; [v2] **re-check Thu 3 Dec 08:00**, before the 18:00 hard stop (if unclear, Contact Us at once, as row 17); **Sat 5 Dec 09:30** (record)	`2026-12-02_smapply_fr_after_button_2000AEDT_01.png` , `..._smapply_fr_tasklist_01.png` , `2026-12-02_smapply_fr_download.pdf` ; `2026-12-05_smapply_fr_status_0930AEDT_01.png`	As row 17. Hard internal stop Thu 3 Dec 18:00 (FRP:596)

Merged duplicates (source → row). The SMApply TNA form (RBK §3.5, CM row 16, OPS:187, M1:86-88, PM2V action 5, KIT:750, QV2 C, WQ:7) → 2. Required trading activity (CM row 13, TC R13, CL:138/:150, QV2 A/B, WQ item 3) → 1 and 3. The 6 Oct email (KIT D7, TL G7, CM §5.5, PM2V E13, M1:62) → 4. Routines (PM2V E9, M1:56, TL L13, OPS R4) → 5. Session Rules (TC §6.2/§7.1, CM row 43, CL:147, QV2 D, FRP W0) → 19 and 27. Fill times (KIT, TL G9, QV2 J, OPS:189, RBK P4) → 9. Listing screenshots (CM row 22, FRP R27/C4/§12, CL:147, QV2 H) → 25. The WInS screen versus the model (FWD §3c, ATT §8a-8d, FRP N19, QV2 F/G) → 18 and 27. Roster strings (CM row 35, RBK F2-F4, QV2 I, TL G10) → 24. Version history (RBK §3.6, TL G14-G16, PM2V E11) → 15 and 21. GitHub (EXP §5, PM2V E10, M1:57) → 6 and 20. COMP:198 (Trade Log) → 9.

Excluded (no login can answer them; they need memory, the school or Wharton): why "0.3" became "about 0.2" and why 167 VT shares were bought (KIT:323, :543); who stayed up on 6-7 Oct (TL G8, memory part); HSC sittings; who signs the school letter; whether the outside reader was paid (CM row 26); Wharton's office hours; whether anyone but the leader may submit (WQ item 4).

Never do while checking

- **No WInS orders, cancels or "Add Note".** Do not open an order ticket for a check. WInS screens are the team leader's (Ray's) only, read-only ([v2] for screens a proposal for the M1 roles vote; the paste checker copies the notes while Ray clicks, rows 16 and 27). Others watch by screen-share. Orders happen only under a logged vote and TC §6 (row 23).
- **No Submit, Review & Submit or Mark as Complete on SMApply** until the logged approve vote (DL-15 TNA, DL-36/38 IPS, DL-53 FR). Then press only the button the three-case rule picks (RBK:393-408). Type nothing into forms while checking. [v2] Tick no declaration, AI, integrity or terms box before the team decides. Never delete an application. Never share the leader's password, and nobody else logs in as the leader.
- **No Delete version history, no Make a copy, no Restore this version** on any team Doc (RBK:69-73, :183-187). No Accept all / Reject all before row 7's inventory. Test unknown Docs behaviour only in a new blank test Doc. Do not change sharing on a file you don't own; ask its owner.
- **No AI tool operating or reading WInS, SMApply, the team inbox or Drive during checks.** That covers browser agents, Claude in Chrome, the built-in browser pane, scheduled routines, Gemini and Copilot. A person clicks every button (RBK:504; M1:101).

- **Never paste usernames, account numbers, passwords, email addresses or surnames into the repo or into any chat** (team chat or AI chat). Crop them from screenshots, and keep the screenshots on the private Drive only. Never commit a screenshot.
- **No GitHub history rewrite to remove AI evidence.** Do not make the repo private before Traffic is captured and the fork is deleted (EXP:14, :164 R1).
- **Do not reply to, forward or label Wharton emails while checking.** Never contact Laura Gao (RR:232).
