Questions for Wharton: send TODAY (Tue 20 Oct 2026, by 22:00 Sydney)

AI-generated research (Claude Code), checked twice (`oct20/askwharton2/questions_v2.md`, verified by `oct20/verify_ask2/verify_ask2.md`: 107 of 107 quotes exact; 20 fixes applied below). **Not an email to paste.** A student rewords each point in their own words and sends it through the Wharton Contact Us form (https://globalyouth.wharton.upenn.edu/investment-competition-contact-us/). Log this AI use in the team's AI-use record. Never contact Laura Gao.

Why today: a reply that can still change the Thu 22 Oct TNA submission has to arrive by about Thu 22 Oct 08:00 Sydney (end of Wed 21 Oct ET). Anything sent before Tue 20 Oct 22:00 Sydney (07:00 EDT) lands before Wharton's first working hour.

Before sending (if they can be done by 22:00): log in and check (A) the SMApply Pages tab for any "trading requirements" page, (B) the weekly emails posted in WInS, (C) the SMApply TNA form itself: open it, do not submit, screenshot every field and button; also look for any AI, integrity, "own work" or terms checkbox or statement on the TNA task or the submitted roster task, screenshot its exact text and do not tick it before the vote [consistency fix 20 Oct, G3]. If any of these answers a question below, drop that question.

Corrected "send today" list (batch 1)

One Contact Us message, sent by the team leader, by Tue 20 Oct 22:00 Sydney (07:00 EDT). Number the items 1-5.

Do self-checks A-C first if they can be finished by then. Otherwise send anyway. A student rewords every item. These are content points, not wording to paste.

1. **AI-use record for the TNA** (always; Q1 as narrowed by E9).
   - (a) The TNA has no Works Cited. Is recording AI use in the Final Report's Works Cited enough, or should the TNA submission also carry a short note?
   - (b) Does this cover Trading Notes written in WInS with help from an AI tool, which the TNA must quote exactly?
   - Default: E10.
2. **How words are counted** (always; Q2 unchanged).
   - Do headings count?
   - Does the quoted note count toward the 100 words?
   - Are hyphenated terms, dollar figures and date ranges one word?
   - Default as corrected by E5. Students re-count their own pitch with the heading.
3. **"Required trading activity"** (send unless check A or B shows a written definition; Q3 plus TOU:228).
   - Apart from the 200-trade limit, the volume rule and the permitted securities, is there a minimum trading activity?
   - Where are the "portfolio management guidelines" published?
   - Default: keep holding; never trade for a count.
4. **If the team leader cannot submit near a deadline** (always; Q6, moved up).
   - May another registered member or the advisor submit?
   - What should the team do?
   - Default: submit early, with the deputy watching; the advisor contacts Wharton at once.
5. **The SMApply form** (only if check C leaves it open; Q4 and Q5 merged, E18).
   - Note text only, or also the WInS date/time and security?
   - Are any team identifiers needed?
   - Can a submitted deliverable be reopened before the deadline?
   - Is a confirmation sent?

Mechanics:

- **Form limits:** subject 80 characters at most. There are no attachments.
- **Content:** no draft text and no strategy description.
- **Who and which address:** the leader sends (age 16 or older), from the SMApply-registered address. Copy the text to the advisor.
- **Username field:** fill the optional username field only inside the form, from the private record, never in a public file.

- **Records:** save the full text before pressing submit. Log the send time in ET and Sydney. Log the AI use, because this list came from an AI tool.

Not sent:

- **Dropped:** S1 (E2) and Q10 (E3) move to "not worth asking".
- **Already answered:** the §2 items stay answered, with the E4, E11 and E19 wording fixes.
- **Batch 2 (Sat 24 to Tue 27 Oct):** Q7; then, optionally, Q8, Q9, and the IPS-tables question if a student draft uses a table.
